Subject: EtO Investigations

Good Morning Folks,

Shaun and I are pulling together a list of our ongoing and planned investigations/activities relating to ethylene oxide (EtO) excess emissions. Can you please provide me with a list of the investigations/activities in your Region. I'm aware of the Sterigenics matter in R5, the Solvay/Lanxess matter in R4, and I believe there were two recent investigations in Region 7 (maybe ACS?). If you are aware of State investigations/activities, it would be helpful to identify them as well.

As a starting point, the name of the case, the date of the investigation, the status of the investigation would be helpful.

Thanks!

Greg
